Linz, 6. November 2023

Betrifft: **POP Regulation (EU) no. 2019/1021**

Dear Ladies and Gentlemen!

As a manufacturer of batteries, we seriously take the concern, of a continuous release of persistent organic pollutants (POP) into the environment, into account.

Therefore we can confirm that no chemical substances are transported across international boundaries, far from their sources, and they persist in the environment, bioaccumulate through the food web, and pose a risk to human health and the environment.

Banner is aware of the protection of the environment and confirms that no chemical substances on the POP list are associated with Banner products or their manufacture.

Best regards,

Banner GmbH
Günther Lemmerer
Head of Product Management
